**Subject:** Re: Permission to make an article that you have published, discoverable in our institutional repository

Good morning

Thank you for getting in touch. As long as the version uploaded is Mark's original text, and not the final *British Wildlife* PDF, that is fine.

Best wishes  
Catherine

Dear British Wildlife Journal/Magazine,

I hope all is well. I am contacting you on behalf of Professor Mark Everard who is a contributing author to one of your journal articles.

Mark is a member of staff here at the University of the West of England (UWE) and would like to deposit the either the full accepted text or the published version of the following article in the University's institutional repository and to be able to make it discoverable. I am emailing to request permission to do this.

**Article:** A review of conservation-relevant issues around British Freshwater fishes in 2022 (Everard, M. (2022). *Wildlife reports: Freshwater fishes*. *British Wildlife*, 34(3), 209-211)

**Author:** Mark Everard

**Link to article:** <https://www.britishwildlife.com/article/volume-34-number-3-page-204-225>

Unfortunately, I am unable to find the journal listed on JISC's Sherpa Romeo at this time in order to assist me in finding which pathways are appropriate and available for Accepted Versions, Published versions etc, regarding CC-BY licences etc, so I would be grateful for your assistance and information. Normally we would also visit the Copyright Clearance Centre (Rightslink), but there is no appropriate option on that site for institutional repository use.

Our institutional repository is a not-for-profit service for our academic authors, providing access to the full text of their publications. Full bibliographic details are given for each article, including the journal of original publication, etc.

If we don't hear from you in one month, we would like to assume that, in line with policies from the majority of publishers and in order to comply with the REF (Research Excellence Framework) policy, we may make in the least, the accepted version of the manuscripts text available on the Repository with no embargo period.

Thank you for your attention with this and I look forward to hearing from you.

Many thanks,

Dan
