

**Table 2**

Comparisons between site-pairs of different aspect and site type but similar altitude using Student's t tests of dependent means ( $n = 5$ ). Similarity coefficients (nominal scale  $S_n$ ; ordinal scale  $S_o$ ) and indices of pioneer persistence (nominal scale  $PP_n$ ; ordinal scale  $PP_o$ ) and importance (nominal scale  $PI_n$ ; ordinal scale  $PI_o$ ) are defined in the text.

	$S_n$	$PP_n$	$PI_n$		$S_o$	$PP_o$	$PI_o$	No. spp.
<i>Aspect comparisons</i>								
Mean difference	6.81	14.38	-2.25		12.82	21.11	0.11	-7.6
Standard error	7.00	7.74	9.69		8.16	11.90	12.25	2.20
Student's t	0.973	1.858	0.232		1.571	1.775	0.009	3.447
<i>p</i>	ns	ns	ns		ns	ns	ns	<0.05
<i>Site-type comparisons</i>								
Mean difference	22.57	19.71	23.46		31.21	26.73	29.52	-4.4
Standard error	2.44	4.39	3.36		3.98	6.70	4.08	1.50
Student's t	9.246	4.493	6.975		7.840	3.930	7.243	2.927
<i>p</i>	<0.01	<0.02	<0.01		<0.01	<0.02	<0.01	<0.05
